FRED

Summary

Not enough record to grade yet.

No inspections and no crashes on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one.

Similar fleets: intrastate fleets of 2–5 trucks with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

0.0 vs 0.0

expected crashes in the next 12 months, vs 0.0 for similar fleets

Most likely none

A record this thin can't pin that down: about a 1-in-5 chance it runs at Poor-level crash rates.

Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (3 power units).

What the record shows

Crash history

better worse

Too little record to tell. 0 crashes on the FMCSA record in 24 months; similar fleets have under 0.1 a year.

Roadside inspections

better worse

No roadside record. No inspections in the scoring window, so roadside results leave its estimate at typical.

Notes on this record

> **Advisory grade — outside the ranked book**
> Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.

FMCSA status today

Operating authority	✓ Operating authority active
Insurance / authorization	✓ Authorized to operate
Out of service	✓ Not out of service
Safety rating	– No FMCSA safety rating

Worth a closer look

From the FMCSA record. The estimate already counts the safety items; insurance filings and links to other motor carriers are context only.

Nothing on the FMCSA record stands out.

Data flags

- **No active operating authority** — The motor carrier's interstate for-hire authority is revoked or inactive, so it isn't currently cleared to haul interstate for hire.
- **Limited inspection history** — Fewer than 5 roadside inspections on record, so there isn't enough data to score this motor carrier with high confidence — the score leans more on peers.

Intrastate fleets of 2–5 trucks in Arkansas are rarely inspected: under 1 inspection would be typical in 24 months for a fleet this size; 81% of them had none.

Yearly rates from the last 24 months. Peers: intrastate fleets, Small (advisory) power units, medium-risk cargo. Inspections per power unit look like an outlier against peers; read the per-unit rates with care.
