Summary

Not enough record to grade yet.

8 inspections and no crashes on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one. It leans worse than similar fleets (about a 60% chance), but not by enough to grade.

Similar fleets: intrastate fleets of 2–5 trucks with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

0.1 vs 0.1

expected crashes in the next 12 months, vs 0.1 for similar fleets

Likely 0–1 crashes

A record this thin can't pin that down: about a 1-in-3 chance it runs at Poor-level crash rates.

Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (3 power units).

What the record shows

Crash history

better worse

Leans worse, not yet proven. 0 crashes on the FMCSA record in 24 months; similar fleets have about 0.1 a year. The grade counts 1 crash in its 36-month scoring window, recent ones weighted most.

Roadside inspections

better worse

Mixed. Violations 1.52× the rate expected for its inspections, but unsafe-driving and hours-of-service violations 0.56× and out-of-service orders 0.65×. Together they move its crash estimate -7%: roadside results weigh far less than crash history. It's inspected more often than most fleets its size.

Notes on this record

Advisory grade — outside the ranked book

Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.

Mileage unreliable

MCS-150 annual mileage appears too low for fleet size given observed activity. The per-100k-mile benchmarks are left out; the FRED grade does not use mileage.

Intrastate operation

Runs within Texas only. Intrastate fleets in Texas are inspected about 1 a year for every 3 trucks; interstate fleets, about 1 a year for every 2 trucks. Its roadside record counts the same way as an interstate fleet's.

Operating authority	Operating authority active
Insurance / authorization	Authorized to operate

Safety rating	No FMCSA safety rating

Worth a closer look

From the FMCSA record. The estimate already counts the safety items; insurance filings and links to other motor carriers are context only.

Lights and brakes

Lights are 17 of 23 violations (74%). Light or brake defects led to 1 out-of-service order.

Ask: the preventive-maintenance schedule and shop records.

Strengths

- No reportable crashes in 24 months.

Data flags

- **Unreliable reported mileage** — The motor carrier's self-reported annual mileage (MCS-150) looks implausible, so exposure- and mileage-based figures may be distorted.
- **Estimated mileage** — No usable mileage was reported, so exposure was estimated from similar motor carriers. Mileage-based metrics here are approximate.
