Why it isn't graded

Not graded: passenger operation. The FRED Score is a property-carrier model; a passenger model is a separate study.

Notes on this record

Stale MCS-150 filing
This motor carrier has not updated their MCS-150 in over 3 years. Reported mileage and fleet size may be outdated.

Intrastate operation
Runs within Indiana only. Intrastate fleets in Indiana are inspected about 1 a year for every 15 trucks; interstate fleets, about 1 a year for every 2 trucks. So this record rests mainly on crash reports, which states file for intrastate trucks too, and few inspections are ordinary here.

High-utilization fleet
This motor carrier reports **282,345 miles per power unit** a year, above typical single-driver limits (~150,000–180,000). It may run team drivers, carry a stale fleet count, or have a mileage entry error.

Nothing on the FMCSA record stands out.

Data flags

- **Limited inspection history** — Fewer than 5 roadside inspections on record, so there isn't enough data to score this motor carrier with high confidence — the score leans more on peers.
