Summary

Not enough record to grade yet.

1 inspection and no crashes on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one.

Similar fleets: intrastate fleets of 1 truck with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

Per truck, fleets like this one are expected to crash about 0.3× as often as the median active fleet of 1 truck.

0.0 vs 0.0

expected crashes in the next 12 months, vs 0.0 for similar fleets

Most likely none

A record this thin can't pin that down: about a 1-in-4 chance it runs at Poor-level crash rates.

Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (1 power unit).

What the record shows

Crash history

better worse

Too little record to tell. 0 crashes on the FMCSA record in 24 months; similar fleets have under 0.1 a year.

Roadside inspections

better worse

Worse than peers. Violations 1.75× and out-of-service orders 1.56× the rate expected for its inspections. Together they move its crash estimate +7%: roadside results weigh far less than crash history.

Notes on this record

Advisory grade — outside the ranked book

Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.

Mileage unreliable

MCS-150 annual mileage is missing or zero despite observed safety activity. The per-100k-mile benchmarks are left out; the FRED grade does not use mileage.

Stale MCS-150 filing

This motor carrier has not updated its MCS-150 in over 3 years. Reported mileage and fleet size may be outdated.

Worth a closer look

From the FMCSA record. The estimate already counts the safety items; insurance filings and links to other motor carriers are context only.

Nothing on the FMCSA record stands out.

Data flags

- **Unreliable reported mileage** — The motor carrier's self-reported annual mileage (MCS-150) looks implausible, so exposure- and mileage-based figures may be distorted.
- **Estimated mileage** — No usable mileage was reported, so exposure was estimated from similar motor carriers. Mileage-based metrics here are approximate.
- **Limited inspection history** — Fewer than 5 roadside inspections on record, so there isn't enough data to score this motor carrier with high confidence — the score leans more on peers.

Yearly rates from the last 24 months. Peers: intrastate fleets, Owner-Operator power units, minimal-risk cargo. Reported mileage is unreliable, so per-mile rates aren't shown.
