Summary

Not enough record to grade yet.

11 inspections and no crashes on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one.

Similar fleets: interstate fleets of 2–5 trucks with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

Per truck, fleets like this one are expected to crash under a tenth as often as the median active fleet of 2–5 trucks.

0.0 vs 0.0

expected crashes in the next 12 months, vs 0.0 for similar fleets

Most likely none

A record this thin can't pin that down: about a 1-in-6 chance it runs at Poor-level crash rates.

Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (3 power units).

What the record shows

Crash history

better worse

Too little record to tell. 0 crashes on the FMCSA record in 24 months; similar fleets have under 0.1 a year.

Roadside inspections

better worse

Better than peers. Unsafe-driving and hours-of-service violations 0.48× and violations 0.50× the rate expected for its inspections. Together they move its crash estimate -13%: roadside results weigh far less than crash history. It's inspected more often than most fleets its size.

Notes on this record

Advisory grade — outside the ranked book

Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.

Mileage unreliable

MCS-150 annual mileage appears too low for fleet size given observed activity. The per-100k-mile benchmarks are left out; the FRED grade does not use mileage.

FMCSA status today

Operating authority	Operating authority active
Insurance / authorization	Authorized to operate
Out of service	Not out of service
Safety rating	No FMCSA safety rating

Worth a closer look

From the FMCSA record. The estimate already counts the safety items; insurance filings and links to other motor carriers are context only.

Cross-border operation

11 inspections on Mexico-plated units.

Ask: operating radius and Mexico lanes.

Strengths

- No reportable crashes in 24 months.
- Driver out-of-service rate 0.0% vs 6.7% national.
- No FMCSA BASIC alerts.

Data flags

- **Unreliable reported mileage** — The motor carrier's self-reported annual mileage (MCS-150) looks implausible, so exposure- and mileage-based figures may be distorted.
- **Estimated mileage** — No usable mileage was reported, so exposure was estimated from similar motor carriers. Mileage-based metrics here are approximate.
- **Mexico-domiciled motor carrier** — Domiciled in Mexico — cross-border operating rules and inspection patterns differ from US-based motor carriers.
