Summary

Not enough record to grade yet.

13 inspections and no crashes on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one.

Similar fleets: intrastate fleets of 2–5 trucks with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

0.1 vs 0.1

expected crashes in the next 12 months, vs 0.1 for similar fleets

Most likely none

A record this thin can't pin that down: about a 1-in-5 chance it runs at Poor-level crash rates.

Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (2 power units).

What the record shows

Crash history

better worse

Too little record to tell. 0 crashes on the FMCSA record in 24 months; similar fleets have about 0.1 a year.

Roadside inspections

better worse

Worse than peers. Violations 1.90× and out-of-service orders 1.70× the rate expected for its inspections. Together they move its crash estimate +8%: roadside results weigh far less than crash history. It's inspected more often than most fleets its size.

Notes on this record

Advisory grade — outside the ranked book

Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.

Stale MCS-150 filing

This motor carrier has not updated their MCS-150 in over 3 years. Reported mileage and fleet size may be outdated.

Intrastate operation

Runs within California only. Intrastate fleets in California are inspected about 1 a year for every 4 trucks; interstate fleets, about 1 a year for every 2 trucks. So this record rests mainly on crash reports, which states file for intrastate trucks too, and few inspections are ordinary here.

Worth a closer look

From the FMCSA record. The estimate already counts the safety items; insurance filings and links to other motor carriers are context only.

Nothing on the FMCSA record stands out.

Strengths

- No reportable crashes in 24 months.
- Driver out-of-service rate 0.0% vs 8.5% for intrastate motor carriers.
- No FMCSA BASIC alerts.

Inspected more often than intrastate fleets of 2–5 trucks in California (about 1 in 24 months would be typical; 62% of them had none).

Inspections per quarter

inspections · with an out-of-service order

Sep 25–30, 2024 isn't charted (too little of that quarter is on file); the 24-month totals include its 1 inspection.

Compared with 12,623 peer fleets
