Summary

Not enough record to grade yet.

3 inspections and 1 crash on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one.

Similar fleets: interstate fleets of 2–5 trucks with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

0.1 vs 0.1

expected crashes in the next 12 months, vs 0.1 for similar fleets

Most likely none

A record this thin can't pin that down: about a 1-in-3 chance it runs at Poor-level crash rates.

Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (2 power units).

What the record shows

Crash history

better worse

Too little record to tell. 1 crash on the FMCSA record in 24 months (about 0.5 a year); similar fleets have about 0.1 a year.

Roadside inspections

better worse

Better than peers. Out-of-service orders 0.51× and violations 0.79× the rate expected for its inspections. Together they move its crash estimate -7%: roadside results weigh far less than crash history.

Notes on this record

> **Advisory grade — outside the ranked book**
>
> Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.

Worth a closer look

From the FMCSA record. The estimate already counts the safety items; insurance filings and links to other motor carriers are context only.

Nothing on the FMCSA record stands out.

Strengths

- 1 crash in 24 months. No injuries, no fatalities.

Data flags

- **Limited inspection history** — Fewer than 5 roadside inspections on record, so there isn't enough data to score this motor carrier with high confidence — the score leans more on peers.

Roadside and crash record

FMCSA record Feb 2025 – May 2026 · grade scored on Oct 1, 2023 → Oct 31, 2026
