# Summary

## Not enough record to grade yet.

6 inspections and no crashes on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one.

Similar fleets: interstate fleets of 2–5 trucks with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

**0.1** vs 0.1

expected crashes in the next 12 months, vs 0.1 for similar fleets

**Most likely none**

**A record this thin can't pin that down: about a 1-in-6 chance it runs at Poor-level crash rates.**

### Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (2 power units).

# What the record shows

**Crash history**

better worse

**Too little record to tell.** 0 crashes on the FMCSA record in 24 months; similar fleets have about 0.1 a year.

**Roadside inspections**

better worse

**Mixed.** Out-of-service orders 1.59× the rate expected for its inspections, but unsafe-driving and hours-of-service violations 0.59×. Together they barely move its crash estimate: roadside results weigh far less than crash history. It's inspected more often than most fleets its size.

# Notes on this record

**Advisory grade — outside the ranked book**

Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.

**Mileage unreliable**

MCS-150 annual mileage appears too low for fleet size given observed activity. The per-100k-mile benchmarks are left out; the FRED grade does not use mileage.

# FMCSA status today

| | |
|---|---|
| Operating authority | ✓ Operating authority active |
| Insurance / authorization | ✓ Liability $750K on file (req. $750K) |

| Safety rating | – No FMCSA safety rating |

# Worth a closer look

From the FMCSA record. The estimate already counts the safety items; insurance filings and links to other motor carriers are context only.

**Driver qualification**

1 out-of-service violation against drivers: 1 no valid CDL (Apr 2025).

Ask: driver qualification files and hiring standards.

### Strengths

- No reportable crashes in 24 months.

### Data flags

- **Unreliable reported mileage** — The motor carrier's self-reported annual mileage (MCS-150) looks implausible, so exposure- and mileage-based figures may be distorted.
- **Estimated mileage** — No usable mileage was reported, so exposure was estimated from similar motor carriers. Mileage-based metrics here are approximate.

# Roadside and crash record
