Summary

Not enough record to grade yet.

2 inspections and no crashes on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one.

Similar fleets: interstate fleets of 6–9 trucks with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

0.1 vs 0.2

expected crashes in the next 12 months, vs 0.2 for similar fleets

Likely 0–1 crashes

A record this thin can't pin that down: about a 1-in-7 chance it runs at Poor-level crash rates.

Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (6 power units).

What the record shows

Crash history

better worse

Too little record to tell. 0 crashes on the FMCSA record in 24 months; similar fleets have about 0.2 a year.

Roadside inspections

better worse

Worse than peers. Violations 1.64× the rate expected for its inspections. Together they move its crash estimate +3%: roadside results weigh far less than crash history.

Notes on this record

Advisory grade — outside the ranked book

Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.

Mileage unreliable

MCS-150 annual mileage appears too low for fleet size given observed activity. The per-100k-mile benchmarks are left out; the FRED grade does not use mileage.

Worth a closer look

From the FMCSA record. The estimate already counts the safety items; insurance filings and links to other motor carriers are context only.

> **Little roadside history**
> Only 2 inspections in 24 months for 6 power units, where interstate fleets of 6–9 trucks in North Carolina average about 10; the record says little either way.
> Ask: confirm the fleet is operating at the filed size (the MCS-150 was last updated Sep 2026).

Data flags

- **Unreliable reported mileage** — The motor carrier's self-reported annual mileage (MCS-150) looks implausible, so exposure- and mileage-based figures may be distorted.
- **Estimated mileage** — No usable mileage was reported, so exposure was estimated from similar motor carriers. Mileage-based metrics here are approximate.
- **Limited inspection history** — Fewer than 5 roadside inspections on record, so there isn't enough data to score this motor carrier with high confidence — the score leans more on peers.
