# Summary

## Not enough record to grade yet.

2 inspections and no crashes on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one.

Similar fleets: intrastate fleets of 1 truck with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

**0.0** vs 0.0

expected crashes in the next 12 months, vs 0.0 for similar fleets

**Most likely none**

**A record this thin can't pin that down: about a 1-in-5 chance it runs at Poor-level crash rates.**

### Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (1 power unit).

# What the record shows

**Crash history**

better worse

**Too little record to tell.** 0 crashes on the FMCSA record in 24 months; similar fleets have under 0.1 a year.

**Roadside inspections**

better worse

**No roadside record.** No inspections in the scoring window, so roadside results leave its estimate at typical.

# Notes on this record

**Advisory grade — outside the ranked book**

Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.

**Intrastate operation**

Runs within California only. Intrastate fleets in California are inspected about 1 a year for every 4 trucks; interstate fleets, about 1 a year for every 2 trucks. So this record rests mainly on crash reports, which states file for intrastate trucks too, and few inspections are ordinary here.

# FMCSA status today

| | |
|---|---|
| Operating authority | Operating authority active |
| Insurance / authorization | Authorized to operate |
| Out of service | Not out of service |

# Worth a closer look

From the FMCSA record. The estimate already counts the safety items; insurance filings and links to other motor carriers are context only.

Nothing on the FMCSA record stands out.

### Data flags

- **Limited inspection history** — Fewer than 5 roadside inspections on record, so there isn't enough data to score this motor carrier with high confidence — the score leans more on peers.
