# Summary

## Not enough record to grade yet.

1 inspection and no crashes on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one.

Similar fleets: interstate fleets of 1 truck with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

**0.0** vs 0.0

expected crashes in the next 12 months, vs 0.0 for similar fleets

**Most likely none**

**A record this thin can't pin that down: about a 1-in-6 chance it runs at Poor-level crash rates.**

### Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (1 power unit).

# What the record shows

**Crash history**

better worse

**Too little record to tell.** 0 crashes on the FMCSA record in 24 months; similar fleets have under 0.1 a year.

**Roadside inspections**

better worse

**Better than peers.** Violations 0.78× the rate expected for its inspections. Together they move its crash estimate -3%.

# Notes on this record

> **Advisory grade — outside the ranked book**
> Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.

# Worth a closer look

From the FMCSA record. The estimate already counts the safety items; insurance filings and links to other motor carriers are context only.

Nothing on the FMCSA record stands out.

### Data flags

- **Limited inspection history** — Fewer than 5 roadside inspections on record, so there isn't enough data to score this motor carrier with high confidence — the score leans more on peers.
