Summary

Not enough record to grade yet.

6 inspections and no crashes on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one.

Similar fleets: interstate fleets of 2–5 trucks with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

Per truck, fleets like this one are expected to crash about 2.1× as often as the median active fleet of 2–5 trucks.

0.1 vs 0.1

expected crashes in the next 12 months, vs 0.1 for similar fleets

Likely 0–1 crashes

A record this thin can't pin that down: about a 1-in-6 chance it runs at Poor-level crash rates.

Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (1 power unit).

What the record shows

Crash history

better worse

Too little record to tell. 0 crashes on the FMCSA record in 24 months; similar fleets have about 0.1 a year.

Roadside inspections

better worse

Worse than peers. Unsafe-driving and hours-of-service violations 1.50× and violations 1.46× the rate expected for its inspections. Together they move its crash estimate +10%: roadside results weigh far less than crash history. It's inspected more often than most fleets its size.

Notes on this record

> **Advisory grade — outside the ranked book**
> Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.
