Summary

Not enough record to grade yet.

No inspections and no crashes on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one.

Similar fleets: intrastate fleets of 1 truck with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

0.0 vs 0.0

expected crashes in the next 12 months, vs 0.0 for similar fleets

Most likely none

A record this thin can't pin that down: about a 1-in-5 chance it runs at Poor-level crash rates.

Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (1 power unit).

What the record shows

Crash history

better worse

Too little record to tell. 0 crashes on the FMCSA record in 24 months; similar fleets have under 0.1 a year.

Roadside inspections

better worse

No roadside record. No inspections in the scoring window, so roadside results leave its estimate at typical.

Notes on this record

Advisory grade — outside the ranked book

Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.

Stale MCS-150 filing

This motor carrier has not updated its MCS-150 in over 3 years. Reported mileage and fleet size may be outdated.

Intrastate operation

Runs within Alabama only. Intrastate fleets in Alabama are inspected about 1 a year for every 5 trucks; interstate fleets, about 1 a year for every 2 trucks. So this record rests mainly on crash reports, which states file for intrastate trucks too, and few inspections are ordinary here.

FMCSA status today

Operating authority	Operating authority active
Insurance / authorization	Authorized to operate

Worth a closer look

From the FMCSA record. The estimate already counts the safety items; insurance filings and links to other motor carriers are context only.

Nothing on the FMCSA record stands out.

Data flags

- **Limited inspection history** — Fewer than 5 roadside inspections on record, so there isn't enough data to score this motor carrier with high confidence — the score leans more on peers.

Roadside and crash record

last 24 months · grade scored on Oct 1, 2023 → Oct 31, 2026

0	0	—	—	0
Crashes	**Inspections**	**Vehicle out-of-service**	**Driver out-of-service**	**Violations**
0 fatalities · 0 injuries · 0 tow-aways	roadside inspections	no inspections Intrastate avg 30.6%	no inspections Intrastate avg 8.5%	0 out-of-service

Intrastate fleets of 1 truck in Alabama are rarely inspected: under 1 inspection would be typical in 24 months for a fleet this size; 85% of them had none.

Compared with 9,881 peer fleets

YEARLY RATE	PER POWER UNIT	PEERS	PER 100K MILES	PEERS
Crashes	0.000	0.018	—	0.014
Inspections	0.00	0.62	—	0.48
Violations	0.00	0.84	—	0.65
Critical violations	0.00	0.11	—	0.08

Yearly rates from the last 24 months. Peers: intrastate fleets, Owner-Operator power units, medium-risk cargo. Inspections per power unit look like an outlier against peers; read the per-unit rates with care.
