Summary

Expected crash rate is probably lower than similar fleets (about a 70% chance), but the record is too thin to say by how much.

Similar fleets: interstate fleets of 6–9 trucks with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

Roadside inspections
better worse
Better than peers. Violations 0.55× the rate expected for its inspections. Together they move its crash estimate -6%: roadside results weigh far less than crash history.

Worth a closer look

From the FMCSA record. The grade already counts the safety items; insurance filings and links to other motor carriers are not in it.

Nothing on the FMCSA record stands out.

Strengths

- Driver out-of-service rate 0.0% vs 6.7% national.
- No FMCSA BASIC alerts.

Data flags

- **Canada-domiciled motor carrier** — Domiciled in Canada — cross-border operating rules and inspection patterns differ from US-based motor carriers.
