# Summary

## Not enough record to grade yet.

5 inspections and no crashes on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one.

Similar fleets: interstate fleets of 2–5 trucks with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

**0.2** vs 0.2

expected crashes in the next 12 months, vs 0.2 for similar fleets

**Likely 0–1 crashes**

**A record this thin can't pin that down: about a 1-in-4 chance it runs at Poor-level crash rates.**

### Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (1 power unit).

# What the record shows

**Crash history**

better worse

**About typical.** 0 crashes on the FMCSA record in 24 months; similar fleets have about 0.2 a year.

**Roadside inspections**

better worse

**Much worse than peers.** Violations 3.12×, out-of-service orders 3.08× and unsafe-driving and hours-of-service violations 2.00× the rate expected for its inspections. Together they move its crash estimate +29%. It's inspected more often than most fleets its size.

# Notes on this record

**Advisory grade — outside the ranked book**

Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.

**Mileage unreliable**

MCS-150 annual mileage is missing or zero despite observed safety activity. The per-100k-mile benchmarks are left out; the FRED grade does not use mileage.

# FMCSA status today

# Worth a closer look

From the FMCSA record. The estimate already counts the safety items; insurance filings and links to other motor carriers are context only.

**Drivers put out of service**

6 out-of-service violations against drivers: 6 hours of service (Oct 2025 – Sep 2026).

Ask: driver supervision and dispatch practices.

### Strengths

- No reportable crashes in 24 months.

### Data flags

- **Unreliable reported mileage** — The motor carrier's self-reported annual mileage (MCS-150) looks implausible, so exposure- and mileage-based figures may be distorted.
- **Estimated mileage** — No usable mileage was reported, so exposure was estimated from similar motor carriers. Mileage-based metrics here are approximate.

## Roadside and crash record
