Summary

Not enough record to grade yet.

No inspections and no crashes on the FMCSA record in 24 months fit anything from an Excellent fleet to a Poor one.

Similar fleets: interstate fleets of 2–5 trucks with the same kind of operation, years in business and amount of road activity. Compared using its own crash record and roadside inspections.

0.0 vs 0.0

expected crashes in the next 12 months, vs 0.0 for similar fleets

Most likely none

A record this thin can't pin that down: about a 1-in-5 chance it runs at Poor-level crash rates.

Ask

Loss runs for the last 3 years, and confirm the fleet is operating at its filed size (5 power units).

What the record shows

Crash history

better worse

Too little record to tell. 0 crashes on the FMCSA record in 24 months; similar fleets have under 0.1 a year.

Roadside inspections

better worse

No roadside record. No inspections in the scoring window, so roadside results leave its estimate at typical.

Notes on this record

> **Advisory grade — outside the ranked book**
> Fleets under 10 power units are graded against their size cohort for reference, but sit outside the 10+ power-unit underwriting book the FRED rank covers.

FMCSA status today

Operating authority	– No for-hire/broker operating authority on file (common: None, contract: None, broker: None)
Insurance / authorization	✕ **Required insurance NOT on file: liability (BIPD) ($0 of $750K)**

Safety rating	– No FMCSA safety rating

Worth a closer look

From the FMCSA record. The estimate already counts the safety items; insurance filings and links to other motor carriers are context only.

> **Little roadside history**
> Only 0 inspections in 24 months for 5 power units, where interstate fleets of 2–5 trucks in New Mexico average about 5; the record says little either way.
> Ask: confirm the fleet is operating at the filed size (the MCS-150 was last updated Sep 2025).

Data flags

- **Limited inspection history** — Fewer than 5 roadside inspections on record, so there isn't enough data to score this motor carrier with high confidence — the score leans more on peers.

Inspected less often than interstate fleets of 2–5 trucks in New Mexico (about 5 in 24 months would be typical; 40% of them had none).

Compared with 57,530 peer fleets

Yearly rates from the last 24 months. Peers: interstate fleets, Small (advisory) power units, medium-risk cargo. Inspections per power unit look like an outlier against peers; read the per-unit rates with care.
